---

To Whom it May Concern,

Making the decision to become more energy efficient at the dairy we sourced some quotes from various companies.

Solar Energy and Battery Storage Solutions were among those that we approached to give us some ideas on what we could do.

Their understanding of our industry gave us the confidence that this was the company to entrust our decision to make a change and become more energy efficient and gain value for our money.

Paul and Kame visited us and went through our options. They have continued to support us and correct and improve our system with getting the best value for money.

With savings between \$1000 to \$1500/month giving us a payback of less than 2.8 years and ROI of 38%, we are very pleased that we have the solar system up and running at the dairy. It is something that we haven't looked back on and look forward to continuing our contact with Paul and Kame of Solar Energy and Battery Storage Solutions.

Yours sincerely,

Chris & Katrina Heathwood
