To Whom It May Concern

This is to let you know that I met Paul Reynolds and Kame Khouzam of Solar Energy and Battery Storage Solutions (SEBSS) in late 2017. They were referred to me by Billabong Hotel Motel Cunnamulla when I was looking to install a solar photovoltaic system on our IGA business in Cunnamulla to reduce our electricity consumption.

During the process SEBSS analysed our electricity bills and designed 2 systems (45kW) to match our consumption. They meticulously explained the entire process and answered our questions with clarity giving attention to details.

Paul Reynolds and Kame Khouzam take a holistic approach and are customer focused. I have no hesitation to recommend them and SEBSS to anyone wanting to install solar for domestic, business or rural applications. Only wish we had met Paul and Kame years ago, we would have saved a fortune in electricity charges, presently we are saving approximately \$2000 per month on our bills.

Sincerely,

Steph Mills
